

ENVIRONMENTAL POLICY

(valid from 1.1.2021)

1. The company's environmental policy is fully in line with Toray group sustainability philosophy and vision (VISION 2030)
2. The basic idea is the growth of the Company while maintaining a balance between development and sustainability
3. The Company shall implement measures and technologies that will lead in particular to a slowdown in climate change
4. Our main priority is to fulfill the vision of an emission-free world in 2050, where air pollutant emissions are fully compensated by absorption
5. Our production processes will be significantly focused on sustainable use of resources with a focus on recycled materials
6. For continuous improvement of the environment, we will focus mainly on water management in the field of wastewater and technologies
7. Waste and chemical management shall always be governed by legislation in order to minimize environmental impacts
8. All environmental aspects shall be regularly analyzed and revised on the basis of the best available technologies
9. Prefer prevention to follow-up countermeasures, prevention of environmental pollution and possible emergency situations
10. These values will be shared by all employees of our Company
